

Santander 2014 intends to deliver the best ISAF Sailing World Championships and the athlete's preparation is a key element for this purpose.

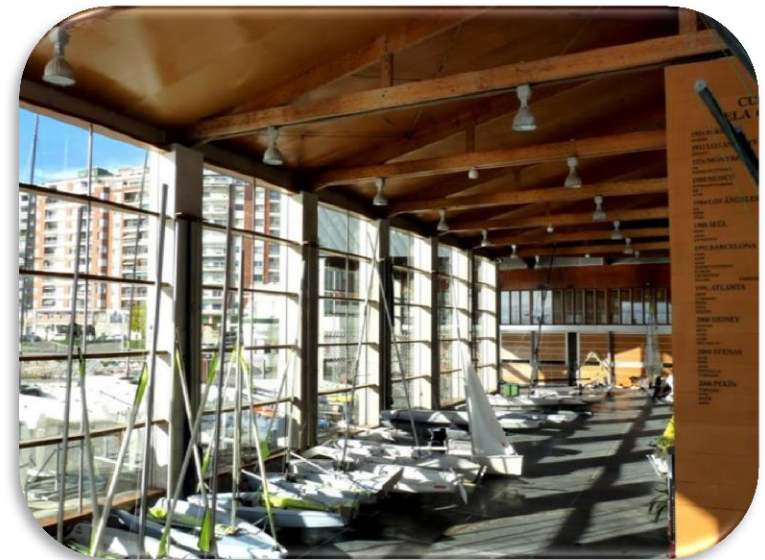

To book the training period MNAs are requested to contact CEAR High Performance Sailing Center (see below) with enough time in advance to ensure that all are catered for and that athletes will have a clear understanding of the arrangements. **Booking will be made only through ONE representative, and must to be endorsed by the MNAs.** The MNAs must specify the number of sailors and period of use of the facility (with a maximum of 7 days extendable) and wait for confirmation from the CEAR. **Places will be allocated by order of booking**, but if one team requests place for a second or third time, priority will be given to teams that have not yet been to the center before.

We are planning to organize training camps for each class; more information will be published shortly.

CEAR High Performance Sailing Center is located within the Santander 2014 event precinct and is centrally positioned to all Santander 2014 courses.

For pre-event training, the sailing center offers accommodation, extensive platforms for boat parking, launch ramps and convenient bathroom and shower facilities for athletes.

In turn, CEAR offers the possibility of storage of trailers and boats.
